Work description.

Inspector(s): Victor Altamirano

Date: 091113

Location: West of OTD building test area S3-D2

Weather: Partly cloudy / 75 degrees

Workers: None.

Field Work

I inspected various times throughout the day the siphon hose that connects from the sodium chloride tank to the wet chambers to see if I needed to try and remove air bubbles. Verified that the water level in the main NaCl / water tank was enough not to re-fill. Test rod did not break during my inspection.
